## Water Carrier – 12000

### Summary Details

Chassis:	Volvo FM 340 6x2 rigid, rear steer. 26,000 kg GVW. 340 hp (253 kW) turbocharged diesel engine. Automated shift manual transmission. Volvo two door long cab for two persons.
Water Tank:	12,000 litre, stainless steel, vacuum type, with external GRP cladding.
Installed Equipment:	Two hydrant fill connections each side. Rear facing vacuum fill and pressure/gravity discharge connections. Vacuum/exhauster pump, PTO/hydraulically driven, nominally 2,500 litre/minute fill/empty rate, providing water tank fill/empty facility.
Superstructure Bodywork:	Heavy duty aluminium modular construction, featuring low level side lockers and front transverse locker, all enclosed by aluminium alloy roller shutter door or hinged door, as appropriate. Low level side access to suction hose stowage in enclosed trays. Access ladder to spill tray.
Accessories:	Full width light bar on cab roof. Siren system. LED repeater lamps at front and rear. Telescopic floodlighting mast. Portable water pump. Water dams and miscellaneous water relay equipment.
