## Multi-Media Fire Fighting Vehicle – 5000

### OUTLINE SPECIFICATION

#### Chassis & Crew Cab

Scania P310CB4X2HSZ 4x2 rigid chassis.  
Engine: 310 hp (228 kW).  
Gearbox: six-speed Allison fully automatic.  
GVW: 20,000 kg.  
High level engine air intake.  
Scania CP28 crew cab with air conditioning.  
Seating for 6 occupants (driver plus five).  
Crew and officer seats with SCBA stowage.

#### Fire Engineering

Water Tank 3,200 litre capacity.

Foam Tank 1,800 litre capacity.

Water Pump Bronze multi-pressure centrifugal pump, nominally rated at 3,400 litre/min at 7 bar. High pressure output for the hose reels. Central suction connection. Four rear-facing screw-down delivery valves. Automatic primer.

Hose Reels Two high pressure hose reels, each with 3 x 18.3 m of 25 mm bore hose (total 54 m) and jet/spray branch pipe. Air powered rewind. High pressure foam induction system.

Foam System Automatic round-the-pump proportioning selectable at 3% or 6% mix ratio.

Water/Foam Monitor Electronically remote controlled, rated at 3,400 litre/minute, with jet/spray nozzle.

Dry Powder Unit 135 kg capacity unit, discharged through a 30 m hose, with trigger-operated nozzle.

#### Bodywork

Heavy duty aluminium alloy construction. Two lockers each side, plus rear pump compartment, enclosed by aluminium roller shutters. Fold-down safety railing at the roof. Slide-out trays and slide-and tilt trays. Beam type lowering gantry for 6.3 m ladder.

#### Equipment / Accessories

LED light bar. Four LED repeater lamps. Siren and PA system. Head lamp flasher. Floodlight mast with LED lamps. Scene lamps. Rear-view camera system. Battery charger with auto-eject connector. Hand lamps. Portable flood lamps. Suction hose and strainers. Delivery hose. Water branch pipes. Foam branch pipes. Collecting head. Dividing breaching. 6.3 m extension ladder. SCBA control board, guide lines and distress signal units. Set of hydraulic rescue equipment with power unit, cutter and spreader. Portable ground monitor. Powered rescue disc saw.
