## High Volume Water Tender - 8000

### Summary Details

Chassis:	Volvo FM 300 4x2 chassis, with rear air suspension. 300 hp turbocharged engine, Euro 5. 12-speed "I-Shift" automated gearbox transmission. 18,000 kg GVW. Two door Volvo day cab, with seating for two persons.
Water Tank:	8,000 litre nominal capacity.
Installed Equipment:	Independent engine driven normal pressure centrifugal water pump, nominally rated at 1,850 l/min at 7 bar. Automatic pump pressure governor for the pump. Electric powered rewind water hose reel with 45 m x 25 mm bore hose, terminating in a jet/spray fog gun, and installed on a swing-out frame. Two 2½" instantaneous normal pressure delivery outlets. 40 mm diameter roadway wet-down sparge pipe located at the rear.
Superstructure Bodywork:	Aluminium alloy construction, with roller shutter doors enclosing lockers at each side. Hinged doors enclosing the pump bay at the rear. Specialised stowage facilities provided for fire fighting and rescue equipment.
Accessories:	Full width low profile LED light bar. Yellow obstruction warning beacon. Emergency warning siren system. LED repeater lamps front and rear. White light scene lamps. Automatic battery charger. Reverse assistance camera system.
